SAMUEL IMOLE PATRICK

FULL-STACK SOFTWARE ENGINEER | MOBILE & WEB ARCHITECT

Email: samuelimolepatrick@gmail.com | Phone: +234 814 922 4954 | Location: Mowe, Ogun State, Nigeria
Portfolio: samuelpatrickimole.vercel.app | GitHub: github.com/ESCANOR-dev-afro | LinkedIn: samuel-patrick

EXECUTIVE PROFILE & ENGINEERING SUMMARY

Results-driven Full-Stack Software Engineer with proven capability in architecting resilient, production-ready applications across mobile, web, and distributed backend environments. Demonstrated track record building 60FPS+ Flutter native apps, high-throughput React & Next.js platforms, and offline-first PostgreSQL/Supabase database systems. Specialized in Clean Architecture, Riverpod state orchestration, double-entry ledgers, and secure authentication.

TECHNICAL SKILLS & CORE ARSENAL

- **â€¢ Mobile Engineering:** Flutter, Dart, Riverpod, GoRouter, Firebase Core/Firestore, Supabase Mobile, Offline-First Sync
- **â€¢ Frontend Web Stack:** React.js, Next.js (App Router), TypeScript, JavaScript (ES6+), Tailwind CSS, Vite, HTML5, REST APIs
- **â€¢ Backend & Databases:** Node.js, Express, PostgreSQL, Supabase, Firebase Firestore, SQLite, IndexedDB, Database Design
- **â€¢ System Architecture:** Clean Architecture, State Management, Double-Entry Ledgers, Kiosk Lockdown, Real-time WebSockets
- **â€¢ Developer Tools:** Git, GitHub, VS Code, Cursor AI, Figma, Postman, Linux CLI, Netlify, Vercel

PROFESSIONAL EXPERIENCE & INDUSTRIAL TRAINING

Software Engineering & Database Architecture Intern (SIWES) — InfoSystem Consulting | Nigeria

- â–¸ Engineered offline-first localized examination engine (AWBA CBT Platform) serving concurrent candidates with zero network latency.
- â–¸ Architected fault-tolerant SQLite/IndexedDB synchronization protocols ensuring 100% exam data integrity during unexpected shutdowns
- â–¸ Constructed kiosk lockdown security rules preventing window defocus, external process spawning, and unauthorized data tampering.
- â–¸ Engineered automated result compilation pipeline reducing exam processing and transcript generation time from hours to seconds.

EDUCATION & ACADEMIC BACKGROUND

Bachelor of Science (B.Sc.) in Computer Science — TASFUED, Ogun State | Enrolled (High GPA)

Institution: Tai Solarin Federal University of Education â€¢ Focus: Data Structures, Algorithms, Systems Architecture & Networking

VERIFIED PRODUCTION DEPLOYMENTS & ENGINEERING NODES

Detailed technical architecture for deployed web, mobile, and enterprise platforms.

01. TASFUED MARKETPLACE *// Campus Commerce Platform* **Live URL â†—**

TECH STACK: React, Vite, Tailwind CSS, Supabase, PostgreSQL

â–¸ Engineered student-to-student e-commerce marketplace featuring categorized listings, search indexing, and seller profiles.
â–¸ Implemented Supabase Auth, PostgreSQL RLS security policies, and sub-second full-text catalog queries.
â–¸ Integrated real-time cart state, responsive desktop/mobile viewports, and multi-image cloud uploads.

02. SCHEDULER (ACADEMIC COMPANION) *// Mobile Schedule Management* **Live URL â†—**

TECH STACK: Flutter, Dart, Supabase, Riverpod Architecture

â–¸ Architected cross-platform mobile timetable suite featuring lecture reminders, conflict detection, and exam countdowns.
â–¸ Implemented offline-first Riverpod state engine caching schedule matrices locally with automatic cloud sync.
â–¸ Designed custom calendar grid and push notification telemetry delivering 60FPS fluid touch responsiveness.

03. AWBA CBT PLATFORM *// Offline Examination System*

TECH STACK: React, Node.js, Electron, IndexedDB, SQLite, Tailwind CSS

â–¸ Built localized offline-first examination engine capable of processing hundreds of candidates with zero internet dependency.
â–¸ Constructed anti-tamper kiosk mode with strict focus detection, secure question randomization, and instant grading.
â–¸ Engineered comprehensive admin telemetry dashboard for real-time exam supervision and bulk result export.

04. FINTECH NEO-BANKING CORE *// Financial Technology*

TECH STACK: Flutter, Firebase Firestore, Node.js, Riverpod

â–¸ Constructed double-entry ledger digital wallet ensuring cryptographic transaction consistency and race-condition immunity.
â–¸ Implemented peer-to-peer fund transfers, real-time analytics graphs, dynamic PIN verification, and audit logs.
â–¸ Orchestrated Firestore atomic batch transactions and cloud function triggers for real-time receipt generation.

05. SARKIN MOTA GROUP *// Automotive Luxury Showroom*

TECH STACK: Next.js, TypeScript, Tailwind CSS, GSAP Motion

â–¸ Developed high-end luxury vehicle showroom platform featuring interactive inventory search, VIN specs, and finance calculators.
â–¸ Crafted 60FPS cinematic scroll-driven animations with GSAP and optimized image delivery pipeline.
â–¸ Designed VIP service appointment scheduling module with instant email confirmation and calendar sync.

06. THE GILDED TABLE *// Hospitality & Dining Platform*

TECH STACK: Flutter, Next.js, TypeScript, Supabase, PostgreSQL

â–¸ Engineered dual-mode hospitality platform (mobile guest app + web command center) with interactive table floorplans.
â–¸ Implemented real-time table occupancy heatmaps, sommelier tasting menus, and kitchen display system (KDS).
